ANNUAL REPORT

OF THE

Superintending School Committee

OF THE

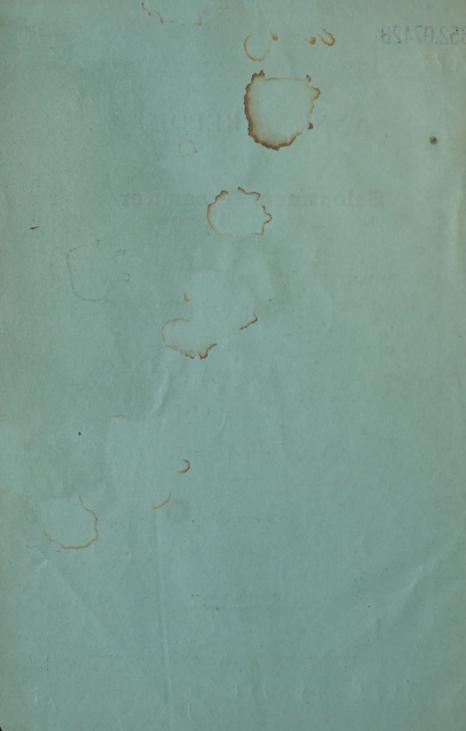

TOWN of RYE, N. H.

FOR THE YEAR ENDING,

March, 1886.

REPORT.

The most important School event of the past year was the passage by the legislature of our State, of a law abolishing all school districts, and adopting what is known as the "Town system" in regard to the supervision of schools. The law is a new one in New Hampshire; but similar ones have been enacted in other States, and the weight of enlightened public opinion seems to be in their favor, after a fair trial. A very large majority of the best educators in New England are firm advocates of the "Town system" as against the old "district system", and in enacting the law alluded to, New Hampshire but follows in the footsteps of adjoining States. In our own town the change will be scarcely noticed, for the schools will remain substantially the same as at present constituted.

In many towns the smaller schools will be consolidated with the larger ones, and radical changes made in district boundaries; but in Rye there is no need of such changes, for the schools are fairly well divided now, in regard to number and location.

The principal benefit anticipated from the passage of the act lies in the direction of a more thorough supervision, and control of the schools by the Board of Education which is to take the place of the Superintending Committee. Under the old system the Superintendent was a mere figure-head, whose duties were mainly to examine Teachers, and occasionally discipline or expel an unruly pupil. If the people exercise a wise discretion in the selection of the Board of Education, the new system cannot fail to be a vast improvement upon the old one. The best qualified men in town ought to be elected to serve in this capacity, and, I doubt not, will be. Viewed from a mercenary standpoint, alone, none of our school or town offices are worth the seeking. Not one of them will pay a man fifty cents on the dollar for the time devoted and services rendered. But every citizen owes to

the community in which he lives his best talents in whatever capacity they are needed. I can add nothing to the force of the suggestions repeated in my previous reports, and leave to my successors the pleasant task of rebuilding our school fabric in accordance with the recently enacted legislative wisdom. For the convenience of those who may wish to refer to it I append the new school law as officially published.

AN ACT in amendment of chapter 86 of the General Laws relating to schools, and to establish the town system of schools. Be it enacted by the Senate and House of Representatives in General Court convened.

Section 1. The division of towns into school districts heretofore existing, is hereby abolished, and each town shall hereafter constitute a single district for school purposes: Provided however that districts organized under special acts of the legislature

may retain their present organization.

Sec. 2. Each town shall forthwith take possession of all the school-houses, lands, apparatus, and other property owned and used for school purposes by the said districts hereby abolished, which said districts might lawfully sell or covey. The property so taken shall be appraised by the assessors of the town, and at the next annual assessment a tax shall be levied upon the whole town equal to the amount of the whole appraisal, and there shall be remitted to the tax-payers of each district, the said appraised value of its property so taken. In the case of a union district, the fractional parts of which belong to different towns, the selectmen of such town shall, acting together, appraise the school property of such union district abolished under the provision of this act. and shall make an equitable apportionment of the property and debts of such districts, and find the balance equitably due from either of said towns to any of said towns, and order such balance to be paid within a time to be by them limited; and whenever such selectmen shall fail to agree upon the apportionment of the property and debts of such union districts, they shall choose a referee, whose decision shall be final.

Sec. 3. The records of the districts hereby abolished shall be preserved by the town, and returned to the several districts.

whenever the town shall vote to return to the district system, under the provisions of section 8 of this act.

SEC. 4. The duties heretofore devolving upon superintending and prudential committees shall hereafter be performed by a school board of three persons in each town, to be chosen by ballot at the annual school-meeting, and to hold office for three years: Provided however, that at the first election under this act, one person shall be chosen for three years, one for two years and one for one year, and thereafter one person shall be chosen each year, and said board shall have power at any time to fill its own vacancies until the next annual meeting of the district.

Sec. 5. The first meeting of such districts so composed of the whole town by virtue of this act, shall be called by the selectmen of such town; and the clerk of such town shall act as the clerk of such district until the clerk of such district is chosen and qualified.

SEC. 6. The said board of each town shall provide schools within the limits of said town at such places and times as in their judgment shall best subserve the interests of education, and as shall give all the scholars of the town as nearly equal advantages as may be practicable; and said school board may use a portion of the school money, not exceeding twenty-five per cent thereof, for the purpose of conveying scholars to and from such schools.

Sec. 7. The provisions of this act shall not be applied to school districts holding funds for school purposes, in such manner as to prevent said districts from retaining and enjoying the benefit of said funds.

Sec. 8. Any town, after five years from the time this act goes into effect, may, by a majority vote of all the voters in the district, reëstablish the district system in such towns, and shall thereafter be subject to the same laws as are now in force in this state in relation to school districts.

Sec. 9, The provisions of the General Laws heretofore enacted in relation to school districts and schools shall be in force so far as the same are consistent with this act and all parts of acts inconsistent with the provisions of this act are hereby repealed.

and this act shall take effect and be in force from and after March 1, 1886.

Approved August 13, 1885.

The South school has not maintained the standard of previous years, owing, in part, to a too frequent change of teachers. The Spring term was taught by Miss Laura Pickering of Newington, who was well qualified and succeeded rather better than the average teacher with her *first* school.

The Fall term was taught by Miss Emma C. Freeman of Portsmouth, who possessed a fair share of book knowledge, but lacked the essential knowledge of human nature not found in books. In a few weeks the school went "all to pieces" and became totally demorilized. A momentary glance sufficed to show that there was no discipline whatever. It is just to the teacher that I should say that she was not wholly responsible for this bad state of affairs; for unless all reports are false, there were some of the unruly pupils who were sustained- if not encouraged in their disobedience, by their parents. The teacher's task is made doubly arduous under such circumstances, but no teacher is respected unless she is able to command respect. I have seen enough country schools to know that even the very best of them require a firm discipline to keep them anywhere within the bounds of propriety. When this is lacking the result is never in doubt.

The winter term was successfully taught by Mr. Thomas M. Higgins of Dartmouth College, who found the school with a legacy of indifference and disorder inherited from the previous term. His firm but kindly discipline, however, soon brought order out of chaos, and very good progress was made considering all the circumstances.

The West School was taught during the year by Miss Clara A. Harvey of Nottingham, who is finely educated and has had much experience in teaching. In my visits to the school I observed a studious interest upon the part of the pupils, and found them very prompt and thorough in their recitation. The discipline was of the best, kindness well tempered with firmness. I should advise the retention of Miss Harvey's services for an other year if they can be secured.

The Centre school was taught during the year by Miss Ada Phillips, who with the close of the present term completes two years of continuous service. The progress made and the excellent condition of the school in scholarship and discipline, is the highest compliment that can be paid to her faithful labors.

The East school has also been under the management of one teacher, Miss M. Emma Merrill, for two years in succession, and I can add nothing to the merited praise heretofore bestowed. Her school seems to be a model one in every respect. If any arguments were needed in favor of retaining the services of conscientious and competent teachers, the present condition of the East, Centre, and West Schools, would furnish them.

The statistical table of this Report is compiled to March 1st.—with the exception of the item giving the "length of school in weeks", which includes the total length of the winter term.

As the schools in the East, West, and Centre districts were not closed at the time of finishing this Report, the statistical table is incomplete,—particularly so in the item recording the "Whole number of visits by parents, citizens and other persons". It is gratifying to know that a very large number of our citizens find our schools sufficiently interesting to visit them; and that on examination day, the school rooms are usually crowded to there utmost seating capacity.
